

CLOSED CELL

CCMC Listing 13527-L Air Barrier System 13583-R

Why Foamsulate™ ECO? -

Unlike fiberglass, cellulose and other traditional types of insulation, our closed cell Foamsulate spray foam products expand to precision to fill even the tiniest cracks and spaces with a long-lasting solid, creating a tighter "thermal envelope" for the most effective, high-quality air barrier that lasts.

Energy Efficiency

Superior Performance and Value

Foamsulate™ ECO has achieved Type 2 status. This is Canada's classification for spray foams who meet the highest criteria for long term thermal resistance (LTTR).

Because Foamsulate™ ECO has a very high LTTR, less material may be required to achieve a specified insulation value.

- Spray foam reduces energy bills by up to 40%.
- Spray foam has a higher R-value and better performance than traditional insulation because it stops air leaks that can reduce R-values by 25-40%.
- Foamsulate[™] ECO expands and fills every space and crack preventing conditioned air from leaking out.

Is Foamsulate™ ECO Right for Your Project?

The superior insulation properties of closed cell spray foam make it ideal for residential, manufacturing plants, factories and industrial park structures that depend on low-maintenance, energy-efficient solutions to ensure profitable operations.

New Construction

Used throughout a new structure, closed cell Foamsulate products create the tightest thermal envelope around the entire building for reduced heating and cooling costs, improved air quality, advanced temperature control, and stronger structural integrity.

Remodels & Upgrades

Using Foamsulate™ ECO in your residential or commercial remodel brings your building to the highest of today's standards for sustainability, energy efficiency, structural integrity and air quality, plus you'll realize immediate monthly savings in energy costs.

The Smarter Choice

Spray Foam Insulation is the material of choice for forming the tightest, healthiest, and most energy-efficient thermal envelope in today's construction and remodeling projects.

Safe

Spray Foam Insulation provides a healthier alternative to traditional insulation. Foamsulate™ ECO closed cell foam provides superior moisture and mold control, creates the toughest air barrier available to keep pollutants and allergens out, and improves air quality indoors.

Affordable

Foamsulate[™] ECO delivers immediate monthly savings in heating and cooling costs, and increases the value of your building, too. Foamsulate[™] ECO pays for itself in energy savings in less than five years.

Green

Closed cell spray foam Insulation creates an exceptionally tight seal that will dramatically reduce your building's energy consumption— and that's the most environmentally friendly thing any of us can do.

All Closed Cell Sray Foams Are Not Ccreated Equal

FoamsulateTM ECO's proprietary closed cell formula has been carefully designed and thoroughly tested to provide our customers with the highest quality, most consistent result and best overall performance.

- > Completely blocks pollutants, dust and allergens
- > Allows for advanced temperature control
- > Ideal for commercial and high-end residential environments
- > Improves structural strength

Save Up to 30-50% on Heating & Cooling Costs!

A professionally-installed Foamsulate™ ECO insulation system stops air leakage problems better than any other insulation material, adding up to big savings you'll see right away.

Closed cell Foamsulate™ ECO is approved for use in:

- > Exterior walls
- > Vented and unvented attic assemblies
- > Between floors
- > Foundations

- > Crawlspaces
- > HVAC ducts
- > Fluid tanks
- > Cold storage units

Training

Doing it right

- Foamsulate™ ECO is exclusively applied by licensed applicators who have been trained to CAN/ULC 705.2, the Standard For Thermal Insulation Spray Applied Rigid Polyurethane Foam.
- Premium Spray Products Canada goes beyond classroom training. Our technical sales representatives provide hands on jobsite training to our installers for additional practical knowledge.

YOUR TRUSTED LOCAL PROFESSIONAL

WHY USE FOAMSULATE™ ECO?

Our Contractors

Every contractor in our network of authorized spray foam insulation applicators has the professional training, safety credentials and experience to deliver the highest level of service and customer satisfaction.

Save Big Every Month

A tighter thermal envelope saves you 30-50% on heating and cooling costs, right away.

Improve Air Quality

Foamsulate™ ECO blocks tiny pollen, dust and pollution particles from entering your building, protecting your home or facility and ensuring cleaner air.

Protect Your Investment

Foamsulate[™] ECO won't sag or settle over time like traditional materials, and its rigidity actually strengthens your building's structure.

Keep Indoor Temps Comfortable & Consistent

Foamsulate™ ECO eliminates indoor hot and cold zones for the most precise temperature control available.
